Global School Health & Nutrition, & Development: Starting with the Fact-finding Survey & Policy/Guidance/Curriculum Analysis, Inter-agency partnership on SHN

April 22, 2020
Deepika Sharma, UNICEF
Dan Laitsch, SFU
Doug McCall ISHN
Emilie Sidaner, WFP
Section 1
1. Describe the reasons and rationale for the survey and document analysis
2. Existing approaches
3. Methodology of the Fact Finding Survey
4. Framework of the Survey (Domains)

Section 2
1. Discuss and share the rationale and overview of the content analysis

Section 3
1. Overview of inter-agency efforts on school health and nutrition
2. Way forward
Why?

Purposes of this Presentation:
1. Describe the reasons and rationale for the survey and document analysis
2. Describe & discuss the major points of inquiry for the two parallel investigations
3. Invite participants to comment on the draft documents subsequent to this web meeting.
4. Invite participants to join an International Research Network and a Consortium of Education & Other Faculties that will work on the results of the survey and document analysis.
The Current State of Fact/Data Gathering
The FRESH Framework defines the core components around health related policy, school environment, health and nutrition services, skilled based health education, and safe water and sanitation environment. 15 thematic (topic/issue-focused) indicators have been defined to monitor and evaluate programmes at the national and school level.

- Multi-component approaches (MCA’s) includes Health Promoting Schools, Child-Friendly Schools, Nutrition Friendly School Initiatives, Safe Schools, Community Schools, WASH, ESD and others that were linked to sectors such as health, child/social protection, law/justice, municipalities (sanitation & sports/recreation) environment and others.
Methodology

The survey will:

• Be sent to all countries and states/provinces (n=300+)

• Ask questions re core components (policy, education, services, social environment and physical environment)

• Ask if country has selected 4-5 national priority issues, components or sub-populations to focus resources

• Ask which aspects of the whole child, which ministries, which of 16 MCA’s, which MIP’s are addressed

• Ask if country has used evidence-based tools:
  • to do situation assessments,
  • to ensure high quality implementation, planning and assessment

• Ask if country participates in global surveys such as HBSC, GSHS, etc

• Ask if country has explicit strategy to integrate/mainstream within education system (educ. Benefits, personnel to schools etc.)

• Ask if country is synergizing with other systems/Ministries such as joint ministry budgeting, joint/paired assignments, consultations with middle managers etc. that modify system routines & structures
Domain 1: Core components of School Based School linked Approaches

- Over-arching Ministry Policies that Require Multiple, Coordinated Interventions
- Required Health/Life Skills Education (Classroom & Extended)
- Minimum requirements for access to, delivery of Health, Social, Food and Other Services
- Minimum requirements for the Physical Environment/Conditions in and near schools
- Minimum requirements for positive Social Environment & Psychosocial Support
Domain 2: Understanding the Country Context, Defining Explicit National Priorities

• Clearly identified national/state priorities
• Thorough Situation Analysis
• Reasonable comparisons and learning from similar countries/states
Domain 3: Systems support for Implementing, Maintaining, Scaling-up and Sustaining (IMSS) components, approaches and programs

- Using a published implementation framework or tool
- Written scale up plan prepared in advance
- Realistic cost estimates for start-up and ongoing costs, human resources, curriculum time, staff training required
- Defined roles, responsibilities, resources and mitigated risks for all partner ministries
- Use best practices in Operational Planning
Domain 4: Building System & Organizational Capacity

- Coordinated Policy & Leadership
- Designated coordinators at all levels
- Formal & Informal Mechanisms for Coordination & Cooperation
- Ongoing Knowledge Exchange & Development
- Regular Monitoring, Reporting, Evaluation & Improvement (MREI) Planning
- Workforce Development
- Joint, Strategic Management of Priority & Emerging Issues
- Explicit Planning for Sustainability
Domain 5: Integrating/Mainstreaming Within Core Mandates, Concerns, Constraints of Education System

- Explicit statement on the role of the education system as host & hub and need to integrate/mainstream within the education system core mandates, concerns & constraints

- Stipulate explicit benefits to education sector goals and student learning

- Support from Other Ministries for Educational Materials

- Designated Front-line Staffing to Work within and Within Schools
Domain 6: Increasing & Improving Systems-Focused Actions & Change

• Explicit long-term plan to make a paradigm shift towards systems focused actions
• Using & developing/testing systems-focused actions & innovations
Section 2
Content Analysis – Life skills, food and nutrition, and social inclusion
A Word about Monitoring, Reporting, Evaluation Leading to Improvement

From the 2017 GEM Report:
“Accountability means being able to act when something is going wrong, through policy, legislation and advocacy, including through ombudspersons to protect citizens’ rights. We need stronger mechanisms across the board to enshrine and enforce the right to education and hold all Governments to account for their commitments, including donors.”

"This is not the approach we are taking – our intent is to encourage countries to use their own data to identify improvements they can make – e.g. data on school food & nutrition is leading into analysis and action."

Global Education Monitoring Report
Accountability in education: meeting our commitments 2017/8
Need to get the facts about the Status Quo

• Secured support to conduct a fact-finding survey of all country/state MOE and other ministry respondents to ask about core components, approaches, programs, inter-ministry policies and more. Will lead to (we hope) improved SDG monitoring, to a more substantive reporting and other global actions.

• The country/states survey will also collect 3000+ curriculum, policy and guidance documents and eventually house them in the UNESCO and other policy databases of education ministry policies/curricula to identify and create web links to HPSD curricula in all countries. Groups of researchers will analyze these documents in different ways. Volunteer researchers work with us to do these analyses are welcome.

• GNDE is seeking support for a capacity study of education faculties that will help us to eventually describe the status of teacher education and development programs related to equity, educational success, health & development
These initial efforts (FFS and Doc Analysis) need to lead to ongoing MREI system – not just a report

- Monitoring means data on context, inputs, process (programs, policies), outputs and long-term outcomes, means comparisons over time, means reasonable comparisons to others or norm-referenced benchmarks or standards
- Reporting means analysis and action recommendations not just score cards or checklists
- Evaluation means asking a specific question that leads to specific changes in direction, resources, assignments,
- Improvement means structured, authorized, required, continuous, self-directed, timely, strategic, incremental and practical change at all levels and across several systems, agencies, local clinics/schools/professionals
Whole Child: Walking the Talk

Choose all that apply

a) **equitable** educational access & success to overcome barriers to learning

b) providing **school/life planning/goals**, educational pathways, vocational planning & guidance, engagement with future, balanced work and life

c) providing **food and other necessities** to hungry or abused/neglected students

d) ensuring the **safety** of children from bullying, violence, crime

e) providing for the **security** of children and youth from conflict, disasters, earthquakes, exploitation & trafficking

f) promoting the physical and mental **health** of children and youth

g) providing clean **water, proper sanitation, hygiene**,

h) delivering **vaccinations, immunizations** and other protections from infectious diseases, /epidemics

i) providing/promoting clean air, protection from environmental hazards, **environmental citizenship**, mitigation of climate change effects (e.g. pollution, sun safety, asthma)

j) promoting **personal development**, social, emotional, honesty/character, moral/spiritual and/or religious development, creativity, critical thinking, decision-making

k) **social development**: responsibility for others, their community, global awareness, human rights, respect for the law, peace, order, good government

l) Another aspect of child/youth development (______________)
## Which Multi-Component Approaches (MCA’s)

Learning/Behaviour Models & Underlying Theories

The initial list of LBM’s includes those listed below. There are several underlying behavioral theories that can explain and guide these LBM’s and the interventions, programs and approaches that flow from these ideas. (Note: Orange font identifies webinars/concept notes completed or planned thus far by the WG.)

• **Literacy in health, security and safety**, including functional knowledge, communication skills, digital & media literacy and critical thinking as well as the ability to access/use reliable information and support from parents, peers, health and other services, protection/police services, trusted adults related to various issues such as child sexual and economic exploitation, hygiene, infectious diseases, abuse & neglect, nutrition, substance abuse, mental health, accidents, environmental hazards, disasters and many others

• **Life skills**, including life/social skills, coping skills related to resilience, conflict resolution skills, social and emotional learning, essential family life skills, financial/economic/consumer literacy, critical thinking, decision-making, positive youth development, self-awareness/knowledge, awareness of social influences & determinants, engagement & empowerment in family, school and community life

• **Social inclusion**, including human rights, global citizenship, peace education, education for sustainable development, gender equality, social responsibility, ethics/morals/faith/spirituality, education to prevent extremism, violence, bullying, and discrimination, education to promote diversity and inclusion of students with disabilities, disaster risk reduction & recovery, diverse sexual orientations/genders and alleviating disadvantages caused by gross social/economic inequities
Policy-Curriculum Collection & Analysis

The documents will be stored in the UNESCO Clearinghouse on Health Education for researchers to access and assess. The IRN will form teams of researchers interested in different aspects of HPSD education. If interested, contact dmccall@internationalschoolhealth.org

Consultations now underway with FRESH Partners and key UN agencies monitoring 4.7.1 and 4.7.2

The analysis on HPSD education will ask about

• curriculum structure (H, H&LS, HPSD, H&PE etc)
• required instructional time,
• coherence with cross-curricular competency frameworks
• status of a generic or essential student learning outcomes in HPSD,
• emphasis on student agency and teacher

The content analysis will be similar to a recent OECD analysis of PE curricula in 16 HRC’s, to a Brooking’s preliminary analysis of 21st Century Learning skills and an IBE-UNESCO 2016 curriculum analysis that used social studies for GCE.

The analysis on social inclusion will emulate an EU analysis and several reviews measuring social & emotional learning.

In depth analyses will be done on school food & nutrition

2. Same question regarding the many Multi-intervention programs (MIPS) on single broad issues
Section 3

*Stepping up effective school health and nutrition*
A renewed UN partnership to advance school health and nutrition

- Strong evidence of what works, yet not yet enough progress
- Inter-agency meeting hosted by UNESCO in July 2019 – Charting a new joint approach to School Health and Nutrition
- Moving forward, aims to mobilize a wide network of partners
Why do we need a renewed, joint approach to SHN?

To mobilise and better align investments, bring proven approaches to scale and respond to learners’ needs holistically

• Speak one voice and mobilise support and funding jointly.
• Work on holistic, multi-component approaches, rather than fragmented initiatives at small scale.
• Stronger and more focussed partnerships for delivery -
• Greater attention to country policy-making and planning. Joint planning and coordination between education, health, other sectors (social protection, finance)
• Track progress and better use existing data and evidence
Opportunities

- Momentum: Strong and growing commitment
- Agencies have recognized technical capacity and an important normative role
- Long experience in practice working with governments
- Existing areas of joint work; partnerships for delivery strengthened in country
In a snapshot: A shared vision and how we can get there

**Sustainable Development Goals**

1. No Poverty
2. Zero Hunger
3. Good Health and Well-being
4. Quality Education
5. Gender Equality
6. Clean Water and Sanitation
7. Affordable and Clean Energy
8. Decent Work and Economic Growth
9. Industry, Innovation and Infrastructure
10. Reduced Inequalities
11. Sustainable Cities and Communities
12. Responsible Consumption and Production
13. Climate Action
14. Life below Water
15. Life on Land
16. Peace, Justice and Strong Institutions
17. Partnerships for the Goals

**Vision**

Healthy and well-educated children and young people achieve their full potential, and countries achieve better social and economic growth.

**Outcomes**

Improved school participation and equal opportunities to learn for all

Improved schoolchildren’s health and nutrition, and life-long healthy diets and lifestyles

Schoolchildren and adolescents have access to the integrated school health and nutrition they need through institutionalized and adequately financed multi-component school health and nutrition programmes and policies

Strong political support for integrated school health at the country, regional and global levels

Increased investment in school health and nutrition

Coordinated, multi-sectorial and evidence-based policies and action in countries

Global progress monitored

**Priority Activities**

Joint Advocacy- School Health in national and global agendas

Data and evidence on school health strengthened and disseminated

Evidence-based guidance and standards

Coordinated policy advice and support to countries
Priorities for joint work

1. **Joint advocacy** for elevating school health and nutrition on global and national agendas, and mobilizing funding

2. More and **better data**, to monitor global progress and inform policy and programming – Status Report

3. **Evidence-based guidance and standards** responsive to country needs

4. **Coordinated policy advice** and support for advancing **multisectoral policies and programmes** at the country level that are embedded in national education systems.
A Status Report on School Health and Nutrition

First consolidated reference documenting the status of SHN core components worldwide

• provide a global overview of current national policies and strategies regarding SHN,
• document whether countries are implementing them and at what scale,
• serve as a baseline to track progress at all levels, through future iterations
• By doing so, inform national and regional strategies to scale up effective, integrated and well-coordinated programmes
A Status Report on School Health and Nutrition

Defining the approach and methodology

• Internal consultations: Draft Concept note
• Internal advisory group and external reference group
• Analytical framework, building on FRESH
• Data sources: published and unpublished reports articles and evaluations, and raw data from existing surveys, such as the GSHS, HBSC and this survey and document review. Will we need additional primary data?
• Publication in 2021
