

A COLLECTION OF NATIONAL AND EDUCATION SECTOR HIV/AIDS POLICIES AND STRATEGIES

This document has been compiled by the **International Institute for Educational Planning (IIEP)/UNESCO HIV/AIDS Impact on Education Clearinghouse** in cooperation with **POLICY/Futures Group**. It aims to bring together, for ease of access, national and education sector HIV/AIDS policies and strategies adopted by governments to manage the impact of HIV/AIDS on their country or more specifically their education systems, to help protect their populations from infection and to care for those who are infected or affected by HIV/AIDS.

These resources are provided for information purposes only and inclusion of a policy or strategy in this document does not necessarily signify approval on the part of IIEP/UNESCO or POLICY/Futures Group.

Please circulate this information as widely as possible. Any comments or suggestions of resources for inclusion should be sent to:

ABOUT THE COMPILERS

The **HIV/AIDS Impact on Education Clearinghouse**, coordinated by the International Institute for Educational Planning, is a platform for sharing knowledge and information on HIV/AIDS and education. The HIV/AIDS epidemic is increasingly threatening the right to education and the attainment of Education for All by 2015, affecting the supply, demand and quality of education. At the same time education can be one of the most effective means of preventing HIV/AIDS. Development of effective policies and advocacy in the education sector requires reliable information reaching key stakeholders (e.g. governments, donors, NGOs, researchers). The Clearinghouse aims to support these key players by systematically collecting the latest studies and research, and disseminating the information through the website, its electronic newsletter and related products.

POLICY is a five-year project funded by the U.S. Agency for International Development under Contract No. HRN-C-00-00-00006-00, beginning July 7, 2000. It is implemented by Futures Group in collaboration with Research Triangle Institute (RTI) and the Centre for Development and

Population Activities (CEDPA). POLICY works with host-country governments and civil society groups to achieve a more supportive policy environment for family planning/reproductive health (FP/RH), HIV/AIDS, and maternal health. Multisectoral engagement, community and organizational empowerment, and promotion of human rights and gender equality characterize POLICY's approaches to better reproductive health policies and programs. To improve the policy environment, POLICY endeavors to:

- Broaden and strengthen political and popular support for FP/RH, HIV/AIDS, and safe motherhood policies and programs;
- Improve the operational environment for these programs, including better planning and financing;
- Ensure that accurate, up-to-date information informs policy decisions; and
- Build in-country and regional capacity to participate in policy development.

Futures Group, a Constella company, specializes in the design and implementation of public health and social programs for developing countries. Since 1971, its staff has worked in more than 100 countries to help forge public-private partnerships and build local capacity to enable people to better manage their futures. A global leader in family planning and reproductive health, HIV/AIDS, maternal and child health, and infectious diseases, Futures Group works with regional, national, and international partners. With a vision of enhancing human health around the world, every day, it provides solutions focusing on advocacy, policy, social marketing, health finance and economics, communications, community mobilization, monitoring and evaluation, gender analysis, capacity development, human rights, and computer modeling and forecasting.
